

**Exceptional
Fibre
Solutions**

XTREME DENSITY SYSTEM > **TRUE FLEXIBILITY FOR YOUR NETWORK**

Molex manufactures some of the most comprehensive fibre systems in the structured cabling market, incorporating a variety of connector technologies and products.

A new feature in Molex's fibre range is the Xtreme Density System, a flexible, configurable rack mount unit for storing and terminating incoming fibre cable. The system incorporates Modules, 1 and 2U rack mount chassis, compatible pre-terminated options, very high density and non-U options, with controlled fibre and cable management throughout. The system's chassis allows multiple technology upgrades on a single chassis, offering extra high density connectivity and management within the same footprint.

Molex's exceptional fibre range offers industry leading flexibility and performance saving time and business costs to fully support your network requirements, now and for years to come.

For over 30 years Molex Premise Networks has manufactured comprehensive copper and fibre optic cabling systems for the transmission of voice, data and video imaging signals.

Through our new and innovative technologies, we now offer solutions that deliver unprecedented productivity gains, process enhancements and incremental value to all businesses in their infrastructure deployment and management.
